## ***Inflatable Emergency Procedures***

Emergencies can arise for various reasons. The following are a few examples of emergencies and how they can be handled. This is strictly a guide, please use common sense when an emergency occurs.

### **WEATHER:**

Bad weather can arrive in the form of rain, lightning or strong wind. In each case you want to evacuate the ride as quickly and safely as possible. Remain Calm! If you panic your riders may also panic. Stay calm and stay focused on your job, which is to help your riders exit the ride quickly, but in an orderly fashion. After everyone has exited the ride, deflate the ride by turning off the blowers or fans.

### **LOSS OF POWER:**

If a loss of power occurs the ride will slowly start to deflate. Remain Calm! You will have ample time to help your patrons quickly and safely exit the ride. This situation tends to cause panic...unless the operator stays calm and relaxed. Talk calmly to those inside the unit telling them not to panic while you're helping them walk out. Check to see if the blowers have come unplugged or the cords are unplugged from the outlet. If so, plug them back in, press the reset button on extension cord and the ride will re-inflate.

Contact or have someone contact AFE at 614-224-9568 for phone support.

Do not leave the ride unattended.

### **NEGLIGENCE OR ABUSE:**

The attendant must strictly enforce the rules posted on the warning sign and remain in control of the ride at all times. If damage occurs, the LESSEE is responsible for repairs, loss of revenue, depreciation, shipping cost and all other cost associated with repairs/replacement of the rental item(s).

LESSEE IS RESPONSIBLE FOR FULL REPLACEMENT COST & LOSS OF REVENUE, IF SILLY STRING IS USED OR EXCESSIVE DAMAGE OCCURS.

### **EQUIPMENT IS RENTED AS IS:**

AFE only guarantees its equipment to be in working order at drop off/set up. Malfunctions or equipment failures will be assumed to be a result of Lessee's misuse and no refunds will be provided.

### **DAMAGE COSTS:**
